

To whom it may concern.

Turn key Air Conditioning have carried out work for Coral since around 1998. In that time they have designed and installed air conditioning and ventilation systems to over 500 of our retail betting outlets and associated properties including the installation and current maintenance the server room close control AC at our Woking office complex.

They consistently deliver their services in a timely manor with the minimum of fuss. Any fault issues post handover are rare and dealt with immediately.

I would without hesitation state that Turn Key are one of Coral's primary AC contractors and very much an asset to our organisation.
